The MAILING DATE of this communication appears on the cover sheet with the correspondence address		
THE REPLY FILED 18 March 2004 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.		
PERIOD FOR REPLY [check either a) or b)]		
a) The period for reply expires 3 months from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f). Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under		
37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).		
1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.		
2. The proposed amendment(s) will not be entered because:		
(a) ☐ they raise new issues that would require further consideration and/or search (see NOTE below);		
(b) they raise the issue of new matter (see Note below);		
(c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or		
(d) ☐ they present additional claims without canceling a corresponding number of finally rejected claims. NOTE:		
3. Applicant's reply has overcome the following rejection(s):		
4. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).		
5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Attachment.		
6. The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.		
7. ☐ For purposes of Appeal, the proposed amendment(s) a) ☐ will not be entered or b) ☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.		
The status of the claim(s) is (or will be) as follows:		
Claim(s) allowed:		
Claim(s) objected to:		
Claim(s) rejected: <u>1-4,6-8,10-15,17-21 and 23-26</u> .		
Claim(s) withdrawn from consideration:		
8. The drawing correction filed on is a) app	roved or b) disapproved by	the Examiner.
9. Note the attached Information Disclosure Statement(s)(PTO-1449) Paper No(s)

Continuation of 5. All the references show a semiconductor light emitting device having "two cleaved end facets" (see figure 2 of Verdiell, figure 5 of Hamakawa, and figure 12 of Kawai).

Response to Arguments

Continuation of 10. With respect to Kawai et al '138, Applicant argues that "the fiber gratings 122-1 and 122-2 are not end facets of the optical waveguide 110 or the optical fiber 120. Rather, the fiber gratings 122-1 and 122-2 are within the optical fiber 120, and the end facets of the optical waveguide 110 shown in the figure are disposed in contact with the semiconductor laser 100. In other words, the end facets of fiber gratings 122-1 and 122-2 are not end facets of the optical waveguide 110." Examiner disagrees. Kawai states that both edges of the semiconductor chip are anti-reflection coated (column 8, lines 28-40). Therefore, the edges of the semiconductor chip do not constitute the ends of the resonator. Instead, fiber gratings 122-1 and 122-2 are end facets of the optical waveguide (column 8, lines 28-40).
